Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This supplemental action is being sent due to an inadvertant typographical error in the previous office action. As such, the period of response will be restarted accordingly.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 12-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fressola.
4. Fressola discloses a method which explains a method of measuring distance between two objects. The method as described involves fractions of light years. This measurement also includes fractions of light seconds, since light years and light seconds are known to be proportionately (fractionally) related. However, Fressola does not specifically disclose the units "billionth of a light second" or "foot" as claimed. Official Notice is taken that these two units as claimed are simple conversions of the known units taught by Fressola. It is also known that a person can convert a length into groupings of *any* desired unit. This is common in the construction industry, where sheets of plywood and studs come in standard sizes. A construction worker will "convert" his measurements to the standard sizes and then determine how many "units" of the material he needs. Therefore, it would have been obvious to one of ordinary skill

in the art at the time the invention was made to convert the units taught by Fressola into the claimed units since such a conversion is based on user preferences.

5. Applicant's arguments filed 13 DEC 2002 have been fully considered but they are not persuasive. The applicant argues that gradations are not specifically shown. This may be true, but the office maintains that it would be obvious to break known units into equal segments as claimed since this is merely subdividing known units.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
